Chapter 1

What is eBay Dropshipping?

eBay dropshipping is a business model where you list products on eBay that you don't physically own. When a customer buys from you, you purchase the item from a supplier (Amazon or AliExpress) and have it shipped directly to the customer. You keep the price difference as profit.

Why It Works in 2026:

- **Zero inventory risk** - Never buy stock upfront. No warehouse needed.
- **Low startup cost** - Start with just an eBay account and internet.
- **135 million buyers** - eBay's global marketplace is massive.
- **17 marketplaces** - UK, US, DE, FR, IT, ES, AU, CA and more.
- **AI automation** - Tools like UnicornDS list products in seconds.

How Sales Work on eBay:

eBay rewards sellers who list consistently. The more active listings you have, the more visibility eBay gives you. Think of it like a numbers game:

- **20 listings/day** = ~600/month = expect 30-60 sales/month
- **50 listings/day** = ~1,500/month = expect 100-200 sales/month
- **100 listings/day** = ~3,000/month = expect 200-400 sales/month

Not every listing sells. That's normal. The key is volume - list enough products and consistent sales follow naturally. UnicornDS also helps you identify and **delete non-performing listings** so your store stays healthy and optimised.

PRO TIP: eBay's Cassini algorithm favours sellers who list daily. Even 10 new listings per day is better than 70 listings on one day and nothing for the rest of the week.

Chapter 2

Two Models: Amazon vs AliExpress

Most successful dropshippers use BOTH models. Here's how they compare:

Amazon Arbitrage

Buy from Amazon at retail price, sell on eBay at a markup. Customers get fast delivery, which means happy buyers, fewer complaints, and better seller ratings.

AliExpress Dropshipping

Source directly from manufacturers. Much lower product cost means higher profit margins. Shipping has improved dramatically - most items now arrive within 4-6 days to UK and EU.

Feature	Amazon	AliExpress
Delivery (UK/EU)	1-2 days (Prime)	4-6 days
Delivery (US/CA)	2-5 days	7-14 days
Delivery (AU)	3-7 days	4-6 days
Profit Margins	15-40%	50-200%
Product Quality	Guaranteed	Varies (check reviews)
Returns	Easy (Amazon handles)	More difficult
Best For	Fast delivery markets	High margin niches
Startup Cost	Higher (retail prices)	Lower (wholesale prices)

PRO TIP: Start with Amazon arbitrage for quick wins and build your seller reputation. Then add AliExpress products for higher margins once you're established.

Chapter 3

Shipping & Delivery Times

One of the biggest concerns for new dropshippers is delivery times. Here's the reality in 2026:

AliExpress Shipping (Updated 2026):

AliExpress has massively improved shipping. With AliExpress Standard Shipping and overseas warehouses, delivery times are now:

Destination	AliExpress	Amazon Prime
United Kingdom	4-6 days	1-2 days
Germany, France, Spain, Italy	4-6 days	1-3 days
Australia	4-6 days	3-7 days
United States	7-14 days	1-2 days
Canada	7-14 days	2-5 days

Setting Handling Time on eBay:

- **Amazon products:** Set 2-3 day handling time
- **AliExpress (UK/EU/AU):** Set 5-7 day handling time
- **AliExpress (US/CA):** Set 10-15 day handling time

Always choose AliExpress Standard Shipping or ePacket - these have tracking numbers that eBay requires.

PRO TIP: Message your buyer after ordering: 'Your item has been dispatched and is on its way! Tracking has been uploaded.' This reduces 'where is my item' complaints by 80%.

Chapter 4

Setting Up Your eBay Account

Step 1: Create an eBay account at ebay.co.uk (or your local site). Use your real name and address.

Step 2: Set up Managed Payments. eBay pays directly to your bank account.

Step 3: Create business policies - shipping, returns, and payment policies.

Step 4: Understand your limits. New accounts start with 10 items/month.

Increasing Your Limits:

- Call eBay seller support every 30 days
- Be polite, explain you're a serious seller
- They'll usually double or triple your limits
- After 90 days of good performance, limits increase automatically
- Goal: reach 1,000+ item limit within 3-4 months

Chapter 5

Finding Profitable Products

UnicornDS Product Hunter - Your Research Command Centre:

Product Hunter searches Amazon by keyword and returns products sorted by reviews, price, and rating. You can:

- Search multiple keywords at once (up to 240 terms)
- Filter by price range, minimum reviews, and rating
- See Prime badge, stock hints, and 'bought in past month' data
- Verify stock levels with one click
- Set minimum stock filter (e.g. only show 30+ qty products)
- VERO brands are automatically filtered out
- Transfer results directly to Bulk Lister
- Export results to CSV for analysis

What Makes a Good Product:

- Price: 5-50 GBP on supplier
- Reviews: 200+ on Amazon (proven demand)
- Rating: 4.0+ stars (fewer returns)
- Stock: 30+ available
- NOT a VERO brand
- NOT clothing/shoes (size issues = high returns)

Chapter 6

VERO Brands: Protect Your Account

VERO (Verified Rights Owner Program) is eBay's brand protection system. **3,390+ brands** are registered. Listing a VERO product can result in:

- Immediate listing removal
- Warning strike on your account
- Account suspension after 3 strikes

UnicornDS 3-Layer VERO Protection:

Layer 1 - Product Hunter: VERO brands are filtered out of search results before you even see them. Improved word-boundary matching catches hyphenated brands like uni-ball, Faber-Castell.

Layer 2 - Bulk Lister: Before each listing is processed, the title and brand are checked against 3,390 brands. VERO products are skipped with status 'VERO brand - skipped'.

Layer 3 - Background Guard: Even if a VERO product somehow reaches the listing stage, the final check in the background blocks it before the eBay tab even opens.

Common VERO Brands: Hugo Boss, Calvin Klein, Nike, Adidas, Apple, Samsung, Sony, Dyson, L'Oreal, Chanel, WaterWipes, Pampers, Tommee Tippee, Faber-Castell, uni-ball, Posca, and 3,360+ more.

Chapter 7

AI-Powered Listing

UnicornDS uses GPT-4o with vision to create eBay listings that rank higher in Cassini search:

AI Title Builder:

- Analyses the product image to understand what it is
- Generates 3 SEO-optimised title options (scored 1-10)
- Uses all 80 characters with relevant keywords
- Avoids banned words and trademark terms
- Short-tail + long-tail keyword strategy

AI Description Builder:

- Creates 1,500-2,000 character HTML descriptions
- Embeds all keywords from the title research
- Structured with sections: overview, features, specifications
- 88-100% keyword coverage on every listing

AI Item Specifics:

- Reads eBay's field definitions for the category
- Generates values for ALL fields (18-23 typically)
- Picks from eBay's dropdown options where available
- Saves via API for 100% reliability

Chapter 8

Item Specifics & Descriptions

eBay's Cassini search engine heavily weights item specifics. Listings with complete specifics rank 40% higher than those without.

How UnicornDS Fills Specifics:

1. Fetches all required and optional fields from eBay's API for the product category
2. AI analyses the product (title, image, description) and generates values
3. Values are validated against eBay's allowed options
4. Saved via eBay's API (server-side, 100% reliable)
5. Also fills the visible DOM dropdowns as visual confirmation

Description Strategy:

UnicornDS uses the 'Show HTML code' editor approach - injecting professional HTML descriptions directly into eBay's editor. The description includes keyword-rich paragraphs that Cassini indexes for search ranking.

PRO TIP: eBay now de-prioritises listings with poor or missing item specifics. Fill EVERY field - even 'Does Not Apply' is better than leaving it blank.

Chapter 9

Pricing for Profit

The most common mistake: not accounting for ALL fees.

Fee	eBay UK	eBay US
Final Value Fee	12.8%	13.25%
Fixed Fee	30p/order	\$0.30/order
Promoted Listing	2-15% (optional)	2-15% (optional)
Insertion Fee	Free (first 1000)	Free (first 250)

Formula: $\text{Sell} = (\text{Cost} \times (1 + \text{Profit}\%) + \text{Fixed}) / (1 - \text{FVF}\% - \text{Promo}\%)$

Example: Item costs 5 GBP. 50% profit. 12.8% FVF + 10% promo:

$\text{Sell} = (5 \times 1.50 + 0.30) / (1 - 0.128 - 0.10) = 7.80 / 0.772 = \mathbf{10.10 \text{ GBP}}$

Your profit: **2.50 GBP per sale** after all fees.

UnicornDS calculates this automatically for every product - showing you exact profit in pounds before you list.

Chapter 10

Variations & Multi-SKU Listings

Many products come in multiple colours, sizes, or packs. UnicornDS handles variations automatically:

- **AliExpress:** Clicks each colour swatch to capture per-variant prices and images
- **Amazon:** Extracts all size/colour options with per-variant pricing
- **MSKU Builder:** Creates multi-SKU listings on eBay with per-variant images, prices, and SKUs
- **EAN Handling:** Automatically sets 'Does not apply' for all variant EAN fields

Each variant gets a unique SKU (e.g. UDS-AZ-B002CB56SG_V1, _V2, _V3) so you can track which variant sold and order the correct one from the supplier.

Chapter 11

Bulk Listing at Scale

This is where the magic happens. Bulk Lister processes multiple products automatically:

1. Paste Amazon/AliExpress URLs (or transfer from Product Hunter)
2. Click Start - UnicornDS processes each product sequentially
3. For each product: scrape, AI title, AI description, AI specs, upload images, fill form, submit
4. VERO check on every single product before listing
5. Duplicate SKU detection - never list the same product twice
6. Price filtering - skip products outside your price range
7. Activity log shows real-time progress for each item

PRO TIP: Use a separate Chrome window for UnicornDS. Keep your main browser window for other work. eBay tabs open in the extension window - you're never interrupted.

Chapter 12

Order Fulfilment & Address Helper

When a sale comes in, you need to order from the supplier quickly:

UnicornDS Address Helper:

- Auto-captures the buyer's shipping address from eBay order page
- One-click auto-fill on AliExpress checkout page
- Also works with Amazon checkout
- Saves 2-3 minutes per order (adds up fast at scale)
- Supports UK, US, EU, AU address formats

SKU Finder (Right-Click to Source):

Every product listed by UnicornDS has a unique SKU like UDS-AZ-B002CB56SG (Amazon) or UDS-AE-1005010148271750 (AliExpress). When an order comes in:

1. Go to your eBay sold items
2. Select the SKU text
3. Right-click and choose 'Open Supplier Page (UnicornDS)'
4. The Amazon/AliExpress product page opens instantly
5. Buy using the customer's address

Messaging System:

Good communication reduces complaints and returns. Send these messages:

- **After order:** 'Thank you! Your item has been dispatched.'
- **After shipping:** 'Tracking uploaded - your item is on its way!'
- **After delivery:** 'Hope you love your purchase! Feedback appreciated.'

Chapter 13

Competitor Scanner

Find out exactly what successful sellers are listing:

- Enter any eBay seller's username
- Scans ALL their pages (up to 10 pages, with pagination)
- Shows: title, price, sold count, watchers, quantity
- Handles sellers with spaces in usernames (retry mechanism)
- 100 items per page with Prev/Next navigation
- Send results directly to Bulk Lister

Strategy: Find 5-10 successful dropshippers in your niche. Scan their stores weekly. List their best-selling products (the ones with high sold counts) on your store.

Chapter 14

Stock Checker & Monitoring

Nothing kills your eBay reputation faster than selling out-of-stock items. UnicornDS Stock Checker:

- Verifies Amazon/AliExpress stock levels before listing
- Shows exact quantity available
- Identifies seller type: Amazon 1P, FBA, FBM+Prime, or FBM
- Product Hunter's 'Verify All' button checks every product at once
- Min Stock filter: only show products with 30+ items available

Chapter 15

Image Designer

Stand out from competitors with professional product images:

- Pre-built templates for different product types
- Add branded watermarks to protect your images
- Overlay badges: 'Free Shipping', 'Best Seller', 'New'
- Border styles for consistent store branding
- Automatic image cleanup (removes EXIF data, resizes)

Available on Growth and Empire plans.

Chapter 16

Listing Tracker & Send Offers

Monitor your listings and engage with interested buyers:

Listing Tracker:

- Monitor active listings performance
- Track views, watchers, and sales
- Identify non-performing listings to delete
- Keep your store clean and optimised

Send Offers:

- Auto-send offers to watchers
- Set minimum acceptable price
- Convert watchers into buyers

Available on Growth and Empire plans.

Chapter 17

Scaling: From Hobby to Agency

Your Growth Roadmap:

Month 1-2: Foundation (10-50 listings/day)

Learn the process. Use Product Hunter to find products. List 20-50 per day. Track profit on every sale. Target: 1-3K GBP/month revenue.

Month 3-4: Growth (50-100 listings/day)

Use Bulk Lister for speed. Scan competitors weekly. Delete non-selling listings. Target: 3-8K GBP/month revenue.

Month 5-6: Scale (100+ listings/day)

Expand to US + DE markets. Use Image Designer for branding. Send offers to watchers. Target: 8-15K GBP/month revenue.

Month 7+: Agency (multiple accounts)

Run 2-3 eBay accounts. Hire VAs for fulfilment. Focus on strategy, not operations. Target: 15K+ GBP/month revenue.

"The difference between a hobby seller and a business is automation. Manual listing limits you to 20 per day. With UnicornDS, you list 200."

Chapter 18

Choosing Your Plan

UnicornDS offers plans for every stage of your business:

Plan	Price	Listings	Best For
14-Day Trial	FREE	100 total	Testing the tool
Starter	23.99 GBP/mo	500/month	Single seller, part-time
Growth	47.99 GBP/mo	1,500/month	Serious seller, full-time
Empire	79.99 GBP/mo	3,000/month	Agency / multi-account
Custom	Contact us	Unlimited	Large agencies

Which Plan is Right for You?

Single Seller (Part-Time): Start with Starter at 500 listings/month. Perfect for building your first store alongside a day job.

Professional Seller (Full-Time): Growth at 1,500 listings/month gives you unlimited competitor scans, stock checks, Image Designer, and Tracker. This is where most full-time sellers land.

Agency / Multi-Account: Empire at 3,000 listings/month is NOT attached to a single eBay account. If you run 2-3 eBay accounts, Empire works across ALL of them - just deducts from your token pool. Perfect for agencies managing multiple stores.

Large Agency: Need more than 3,000/month? Contact us at hello@unicornds.io for custom packages with unlimited listings and dedicated support.

PRO TIP: Start with the 14-day free trial (100 listings). If you see results, upgrade to Starter. Most sellers upgrade to Growth within 2 months as their business grows.

Chapter 19

Daily Routine & Best Practices

Here's a proven daily routine for eBay dropshipping success:

Morning (30 min):

- Check eBay orders - fulfil overnight sales
- Use Address Helper for quick order processing
- Reply to buyer messages

Midday (1-2 hours):

- Product research with Product Hunter (search 20-50 keywords)
- Scan 2-3 competitors with Competitor Scanner
- Transfer best products to Bulk Lister

Afternoon (1 hour):

- Run Bulk Lister - list 50-100 products
- While it runs, work on other tasks

Evening (15 min):

- Check listing tracker - delete non-performers
- Send offers to watchers
- Review daily profit

Best Practices:

- List DAILY - consistency beats bursts
- Diversify niches - don't put all eggs in one basket
- Always use promoted listings (10% is sweet spot)
- Never list VERO brands - one suspension can end your business
- Keep 5-star feedback - message buyers proactively
- Delete listings with 0 views after 30 days

Chapter 20

Resources & Next Steps

Start Your Journey:

- **Free Trial:** unicornds.io/download (14 days, 100 listings)
- **YouTube Demos:** youtube.com/@Unicornds_io
- **Blog:** unicornds.io/blog (30+ SEO guides)
- **Support:** hello@unicornds.io
- **Pricing:** unicornds.io/pricing

UnicornDS Features Summary:

Feature	What It Does
Product Hunter	Search Amazon, filter, verify stock, transfer to Bulk Lister
Competitor Scanner	Scan any eBay seller's entire store
Bulk Lister	List 50-200 products per day automatically
AI Title Builder	GPT-4o generates SEO-optimised titles
AI Description	Keyword-rich HTML descriptions
AI Item Specifics	Auto-fills all eBay category fields
VERO Protection	3,390 brands blocked automatically
Image Designer	Branded templates, watermarks, badges
Stock Checker	Verify supplier stock before listing
Address Helper	Auto-fill shipping addresses for ordering
Listing Tracker	Monitor views, watchers, sales
Send Offers	Auto-offer to watchers
SKU Finder	Right-click to open supplier page
Variation Builder	Multi-SKU with per-variant images/prices
